

Summer 2021

Dear Camper,

We are excited that you have chosen to participate in the upcoming camp at Anderson University. Our hope is that you experience a sense of community while on our campus and remain safe and healthy at the same time.

As you know, the 2019 Coronavirus pandemic has created challenges for people who wish to gather together, and with the spread of the Delta variant, this summer is no exception. We invite you to our campus with open arms AND we hope that you will take some precautions to ensure that every person leaves camp happy and healthy.

If you qualify for (and have received) the COVID19 vaccine, you are presumed safe to engage in camp activities without constraints. If you haven't been vaccinated, we hope that you will choose to be tested for COVID19 3 days before you arrive, and it is recommended that you wear a mask during indoor gatherings.

Whether or not you are vaccinated, please stay home if you are experiencing any of the following symptoms: runny nose, headache, sore throat, fever, or cough. These simple measures will help protect the community of campers from possible spread of the virus.

I understand that due to the high national infection rate of SARS-CoV-2, combined with any additional personal risk factors (comorbidities, congregate or group living status) my child may be at increased risk of acquiring COVID19.

So that we can better understand the level of herd immunity and susceptibility to COVID19 on our campus, please select the descriptions that best fit the camper:

To my knowledge, I do not have COVID19 and have not been exposed to anyone who has COVID19 for the past 14 days.

I am completely vaccinated against COVID19 (final vaccination at least two weeks ago).

I am partially vaccinated against COVID19 (having one dose of a two dose series).

I am not eligible for vaccination, or I decline it.

-OVER-

I have tested negative for COVID19 within the past three (3) days before camp (recommended for campers who have not been vaccinated).

I decline testing for COVID19.

NOTE: The CDC recommends that all campers watch for symptoms of COVID19 upon returning home from camp, and unvaccinated campers are encouraged to obtain a screening test for COVID19 even if they are not experiencing any symptoms after they return home.

If your child tests positive following their camp experience, please notify us at covid19@anderson.edu

Thank you!
