7430 - SAFETY STANDARDS

The School Board believes that the employees and students of this **School** Corporation, as well as visitors, are entitled to function in an environment as free from hazards as can reasonably be provided. In this regard and in accordance with law, the Board will provide reasonable and adequate protection to the lives, safety, and health of its employees **and students**.

In accordance with State law, the Board will designate safe areas and comply with disaster protection guidelines. The Superintendent shall be responsible for the maintenance of standards in the facilities to prevent accidents and to minimize their consequences.

The Superintendent shall, with the approval of the Board, designate an individual to serve as the school safety specialist for the **School** Corporation. The school safety specialist shall:

- A. conduct periodic audits of health and safety conditions within the facilities of the Corporation in accordance with the Federal OSHA standards adopted by the State, and report any violations to the Superintendent;
- B. have the authority to organize and direct the activities of a Corporation safety committee;
- C. serve on the county safety commission, if one is established within the county;
- D. participate in the school safety training when the county safety council determines it is to be held;
- E. assist the county safety council with the development of a safety plan for each school in the Corporation;
- F. coordinate the safety plans of each school in the **School** Corporation as required by rules adopted by the Indiana State Board of Education;
- G. act as a resource for other individuals in the **School** Corporation on issues related to school discipline, safety, and security.

The Corporation shall test the drinking water in any child care facility or preschool operated by the Corporation before January 1, 2026, to determine whether lead is present in the drinking water in a concentration that equals or exceeds the action level for lead. Drinking water testing required by this section must be performed in accordance with the lead sampling program for school buildings and child care facilities conducted by the Indiana Finance Authority. If the drinking water in a Corporation child care facility or preschool has been tested through a lead sampling program conducted by the Indiana Finance Authority, additional testing is not required. If the testing of the drinking water in a Corporation child care facility or preschool indicates that the presence of lead in the drinking water equals or exceeds the action level for lead, the Corporation shall take action to reduce the concentration of lead in the drinking water to a level below the action level for lead by:

- A. **eliminating the source of the lead in the drinking water; or**

- B. installing a water filtration system that will reduce the level of lead in the drinking water to a level below the action level for lead. The water filtration system must meet the requirements of I.C. 16-41-21.2-4(e) and (f).

The Superintendent shall ascertain that the employees and students of this Corporation are aware of their rights to an environment free of recognized hazards, that they are properly trained in safety methods, that protective devices and equipment are available to meet safety standards, and that proper guidelines and records are maintained to meet the requirements of the law.

7440.01 - **ELECTRONIC MONITORING AND RECORDING**

In order to protect School Corporation property, promote security and protect the health, welfare and safety of students, staff and visitors, the School Board authorizes the use of video and audio monitoring equipment on Corporation property, and on school buses. Information obtained through video and audio monitoring may be used to identify intruders and persons violating the law, Board policy, or the Student Code of Conduct.

The monitoring of the conduct of persons on Corporation property is intended to assist students, staff, and visitors in protecting themselves and their property. Video and audio monitoring is to complement other means being employed by the Board and staff to provide a safe and secure working and learning environment for students and staff.

The monitoring of actions and behavior of individuals who come onto school property is a significant factor in maintaining order and discipline and protecting students, staff, visitors, and school and student property. Video surveillance/electronic monitoring systems serve to complement other means being employed in the Corporation to promote and foster a safe and secure teaching and learning environment for students and staff. The Board recognizes that the use of a video surveillance/electronic monitoring system does not replace the need for the ongoing vigilance of the school staff assigned by the building principal to monitor and supervise the school building. Rather, the video surveillance/electronic monitoring system serves as an appropriate and useful tool with which to augment or support the in-person supervision provided by staff. The building principal is responsible for verifying that due diligence is observed in maintaining general campus security.

The Superintendent is responsible for approving where and when to install and operate fixed-location monitoring equipment. The building principals and administrators responsible for other facilities shall be responsible for recommending use of monitoring in those facilities. Monitoring equipment may be placed in common areas in Corporation facilities. Common areas include hallways, entryways, offices where students, employees and visitors are permitted to freely come and go, gymnasiums, cafeterias, libraries, parking lots and other outside areas, and in school buses. Except in extraordinary circumstances such as a response to possible bullying, hazing, harassment, personal injury, property damage, or theft, and only with the written authorization of the Superintendent, monitoring equipment shall not be used in areas where persons have a reasonable expectation of privacy (e.g., restrooms, locker rooms, changing areas). In assessing whether extraordinary circumstances exist, the Superintendent shall consult with Corporation legal counsel before authorizing placement of monitoring equipment in private areas in which privileged communications occur (unless there is express consent given by the office occupant), or conference/meeting rooms, or in individual classrooms during instructional times. Access to live monitoring or recordings made in private areas will be based on the need for access to respond to the information obtained.

A person who blocks, moves, or alters the location or viewing angle of monitoring equipment, or attempts to do so shall be subject to disciplinary action.

Legible and visible signs shall be placed at the main entrance to buildings in which monitoring equipment may be deployed. These signs shall notify people entering through that entrance that their communication and actions may be monitored and recorded in the facility they are entering. Students and staff shall also be advised of the use of monitoring

the recording equipment in Corporation facilities and on Corporation property.

Information obtained from monitoring and recording may be used to support the safe and orderly operation of the Corporation's schools and facilities. This includes providing access to monitoring or recordings to law enforcement officers when proper authority in support of the requested access is provided. Records obtained through the use of monitoring equipment installed and operated in compliance with this policy may be authenticated and used as evidence in any forum in which its use would assist in the search for the truth concerning the recorded event. Recording that focuses on and follows a specific student or staff member may become a part of the student's education record or the staff member's personnel file.

Monitoring and recording equipment capability shall not be used to intercept or record communication between persons unless at least one of the participants is aware of the possibility of monitoring and recording. The results of monitoring or recording shall not be used for any tortious or criminal purpose and shall never be used in violation of the rights of the persons whose communication is monitored or recorded.

Monitoring equipment will not be used to make a recording of the results of monitoring except as authorized by the Superintendent.

[X] Smart Sensor Monitoring Technology

[DRAFTING NOTE: This policy is offered to address the emerging monitoring technology used to detect vape smoke and the like.]

To protect students and faculty, promote security, and protect the health, welfare, and safety of students, staff, and visitors, the Board authorizes the use of smart sensor electronic monitoring equipment on school property, including in school buildings and on school vehicles. Smart sensor monitoring technology uses devices that can sense, collect, and process a variety of environmental information. Information obtained through smart sensor devices may be used to identify intruders and persons breaking the law, Board policy, or the Student Code of Conduct; as such, it may be used as evidence in disciplinary actions and may be provided to law enforcement in appropriate circumstances.

The monitoring of actions and behavior of individuals who come onto school property is a significant factor in maintaining order and discipline and protecting students, staff, visitors, and school and student property. Smart sensor monitoring systems serve to complement other means that the District employs to promote and foster a safe and secure teaching and learning environment for students and staff. The Board recognizes that the use of a smart sensor monitoring system does not replace the need for the ongoing vigilance of the school staff assigned by the building principal to monitor and supervise the school building. Rather, the smart sensor monitoring system serves as an appropriate and useful tool with which to augment or support the in-person supervision provided by staff. The building principal is responsible for verifying that due diligence is observed in maintaining general campus safety and security.

The Superintendent is responsible for determining where to install and operate fixed-location smart sensor monitoring equipment in the District. The determination of where and when to use smart sensor equipment will be made in a nondiscriminatory manner. Smart sensor monitoring equipment may be placed in designated areas in school buildings (e.g., school hallways, restrooms, classrooms, gymnasiums, libraries, locker rooms, entryways, the front office, and other areas where students, employees, and visitors are permitted to freely come and go). The Superintendent will post notices in areas where smart sensor monitoring equipment is in use. ~~(→ The Superintendent will also provide written communication to parents and staff when smart sensor monitoring equipment is installed. [END OF OPTION]~~

Any person who takes action to block, move, or alter the location of a smart sensor device shall be subject to disciplinary action.

Any information obtained from smart sensor monitoring systems may only be used to support the orderly operation of the School District's schools and facilities and for law enforcement purposes and not for any other purposes. As such, information obtained through the use of smart sensor monitoring equipment may be used as evidence in any disciplinary proceedings or administrative proceedings, or provided to local law enforcement, subject to Board policy and administrative guidelines.

Smart sensor monitoring technology is to be implemented in accordance with this policy and the related guidelines. The Board will not accept or tolerate the improper use of smart sensor monitoring equipment and will take appropriate action in any cases of wrongful use of this policy or such technology.

[END OF SMART SENSOR MONITORING OPTION]

Monitoring and recording equipment will not be used for the purpose of routine staff appraisal/evaluation. However, prerecorded lessons or observations of online or virtual learning sessions may be included as part of an employee's evaluation, subject to discussion with the exclusive representative of the Corporation's teachers prior to adoption of this

policy.

Further, if an employee is assigned to work remotely (i.e., telework), the administration is authorized to conduct observations that consist of the supervisor reviewing video-recordings of the employee working and/or watching the employee perform ~~his/her~~ job responsibilities through means of a live-stream that includes both video and audio, provided the employee is afforded advanced notice of the observation, subject to discussion with the exclusive representative of the Corporation's teachers prior to adoption of this policy.

Additionally, nothing herein shall prevent the administration from using information gathered through electronic means (i.e., viewing a video-recording or live-stream of an employee working) for employment purposes, including but not limited to completing components of an evaluation, subject to discussion with the exclusive representative of the Corporation's teachers prior to adoption of this policy.

Recordings containing personally identifiable information about a student shall not be released except as required or authorized by the Family Educational Rights and Privacy Act ('FERPA'). A parent or guardian of a student, and a student who is eighteen (18) years of age or older shall have access to relevant portions of any video or audio recording related to disciplinary charges against the student. Upon written request to the building principal, if the requested access does not violate State and/or Federal law (i.e., the privacy rights of any other student whose images appear on the recording), a recording may be exhibited to a parent/guardian and an eligible student. However, the parent/guardian and student will not be given a copy of the recording.

School personnel with responsibility for the program of a student may have access to relevant portions of a recording related to the services they delivered to the student and any disciplinary charge against the depicted student.

The Board shall maintain monitoring recordings for a limited period. Any request to view a recording under this policy must be made within ten (10) days of the event/incident. Unless an investigation is being conducted, or the Corporation legal counsel advises that specific recordings must be preserved pursuant to a 'litigation hold' notice, recordings may be destroyed after thirty 300 days. If, however, action is taken by the Board/administration based upon recorded events, the recordings shall be kept for a minimum of two (2) years from the date of the action taken. Recordings may also be kept beyond the normal retention period if they are going to be used for training purposes. This policy shall not be interpreted to guarantee the destruction of a recording after any specific length of time.

With the knowledge of the persons depicted, students, staff or a parent/guardian may record a school event open to the public such as a play, music performance, athletic contest, graduation, or Board meeting. Instruction may be recorded for staff evaluation or educational or research purposes.

The Superintendent may develop administrative guidelines consistent with this policy to address the use of monitoring and recording equipment in school buildings, school buses and on property owned and/or operated by the Corporation.

Monitoring is to be implemented in accordance with this policy and the Superintendent's guidelines. The use of monitoring and recording equipment in violation of this policy will result in disciplinary action.
